ABHISHEK GANGWAR

Aspiring Agentic AI Engineer | Generative AI | Multi-Agent Systems

GitHub | LinkedIn | India

Professional Summary

Computer Science undergraduate focused on Agentic AI and Generative AI application development. Experienced in building multi-agent applications, integrating LLM APIs, implementing RAG pipelines with embeddings and vector databases, and deploying full-stack AI applications using Docker and AWS.

Technical Skills

AI/GenAI: LLM Integration, Multi-Agent Systems, Retrieval-Augmented Generation (RAG), Embeddings, Vector Search, Gemini API, LangChain, LangGraph
Languages: Java, JavaScript, Basic Python
Backend: Node.js, Express.js, REST APIs
Databases & Infrastructure: MongoDB, SQL, Redis, Qdrant, Docker, Docker Compose, AWS EC2, GitHub Actions CI/CD
Frontend: React.js

Projects

Nexora AI — Multi-Agent AI Collaboration Platform Live Demo | GitHub

- Developed a multi-agent AI platform featuring conversational AI, coding assistance, and document generation using a modular backend architecture.
- Implemented RAG using Gemini embeddings and Qdrant vector search for context-aware information retrieval; integrated Redis-backed services and credit-based plans with Razorpay billing.
- Deployed containerized services on AWS EC2 using Docker Compose and automated application releases through GitHub Actions CI/CD.

Virtual Courses LMS — AI-Powered Learning Platform Live Demo | GitHub

- Built a full-stack learning platform with educator/student workflows, course management, enrollment, and certificate generation.
- Developed an AI tutor that uses lecture and course context to generate summaries and answer student questions.

InsightX-AI — Data Analytics Platform GitHub

- Developed a data analytics application for processing CSV and spreadsheet data, generating reports, and presenting actionable insights through dashboards and downloadable Excel reports.

Experience

Full Stack Developer Intern — PayVista Technology Solutions *Remote | Jul–Sep 2026*

- Developed backend functionality for a data analytics platform using Node.js and SQL, including REST APIs for file processing, analytics, and reporting workflows.
- Contributed to dashboard generation, downloadable Excel reports, and deployment automation using GitHub Actions.

Education

Ajay Kumar Garg Engineering College (AKGEC) — B.Tech, Computer Science and Engineering *Expected 2027*
CGPA: 8.0/10

Achievements

- Ranked in the **Top 100 among 1,000+ teams** at Executive 4.0 Hackathon, DTU.
- Solved **250+ DSA problems** across LeetCode and GeeksforGeeks.
